

SMART BETTING CLUB FEATURE

HOW TO EARN CASHBACK BETTING BY USING E-WALLETS

The Smart Betting Club has one key overriding aim – to help you make money betting and with that in mind, I wanted to share with you details on how you can make cashback simply by using a range of e-wallets to fund your betting accounts.

e-wallets such as those offered by [Neteller](#), [Skrill](#) & [ecoPayz](#) allow you to deposit and withdraw into all major bookmakers and exchanges and crucially – keep your betting activity separate to all your day to day bank accounts.

You simply load cash into your e-wallet from your bank account and then transfer those funds into your betting accounts when needed.

And it is this transferring of funds from your e-wallet and into your betting accounts where you can earn cashback – up to 1.1% with [Neteller](#) and start to earn money whether your bets win or lose.

It is a simple, effective way to earn money each month simply by moving your funds from e-wallet to betting accounts and back. Those of you betting in medium to large sums each month can easily start to make a good level of extra income for very little work indeed.

It's simple to do and to help you explain more, I have been working with e-wallet cashback expert – **Johannes Turunen** who has prepared the following guide on how it operates.

Over to Johannes...

Q&A: WHY USING YOUR E-WALLET WILL MAKE YOU MONEY MONTH AFTER MONTH WHEN BETTING

HOW DID YOU FIRST HEAR ABOUT EWALLET-OPTIMIZER?

Johannes: As an online poker player since 2010, after my initial deposit from bank I was always using [Skrill](#) for my deposits and withdrawals to poker sites as it was the most convenient way of moving money. Later I discovered arbitrage and matched betting somewhere between 2012-2013 and started to clear available deposit bonuses from bookmakers, but it wasn't until 2016 that I came across [eWallet-Optimizer's website](#) and realized their program is something every poker player and sports bettor could benefit from. Since then I've introduced many friends and players to them.

My clear advice to all SBC readers is to open up an account with [eWallet-Optimizer](#) and start to benefit from generating cashback simply by moving your money to and from bookmaker accounts.

WHAT ARE THE MAIN BENEFITS OF EWALLET-OPTIMIZER PROGRAM FOR SPORTS BETTORS?

Without question, the monthly cashback is the biggest benefit. Bettors from all over the world have made hundreds of pounds, some even thousands, by utilizing this program... and obviously I hope you will achieve the same!

Other perks include personal Skype support 365 days a year, free MasterCard for your account, instant VIP upgrades for [Neteller](#) and [ecoPayz](#) and easier VIP upgrade requirements for [Skrill](#).

The overview of the benefits for each wallet are:

Skrill

- **0.3% Cashback on all Merchant Transfers**
- **\$15 Welcome Bonus for new clients**
- **Easier and Faster VIP Status Upgrade**
- **Additional & Personal Support 365 days a year**

NETELLER

- **0.3 – 1.1% Cashback on all Merchant Transfers**
- **Instant Silver VIP Status with free MasterCard**
- **Fully Verified within 1 Business Day**
- **Additional & Personal Support 365 days a year**

ecoPayz

- **0.6 – 1% Cashback on all Merchant Transfers**
- **Instant Gold VIP Status with Free MasterCard**
- **Fully Verified within a few hours, 7 days a week**
- **Additional & Personal Support 365 days a year**

To access all of the above benefits, you can join the [eWallet-Optimizer program here](#) and start to earn cashback moving money from your e-wallet to your bookmaker accounts.

HOW DOES THE CASHBACK WORK IN PRACTICE?

Once your e-wallet account is accepted to the program, you can use it for deposits to any merchants: bookmakers, exchanges, poker sites, casino sites and forex sites. **Your cashback will**

be calculated from your monthly volume of these merchant transfers and paid to your e-wallet on the following month.

This means that no matter if you have a winning, breakeven or losing month with your betting, the cashback will form a steady stream of extra money as long as you make deposits to bookmakers on a monthly basis.

WHAT KIND OF RESULTS HAVE EXISTING CUSTOMERS OF EWALLET-OPTIMIZER ENJOYED?

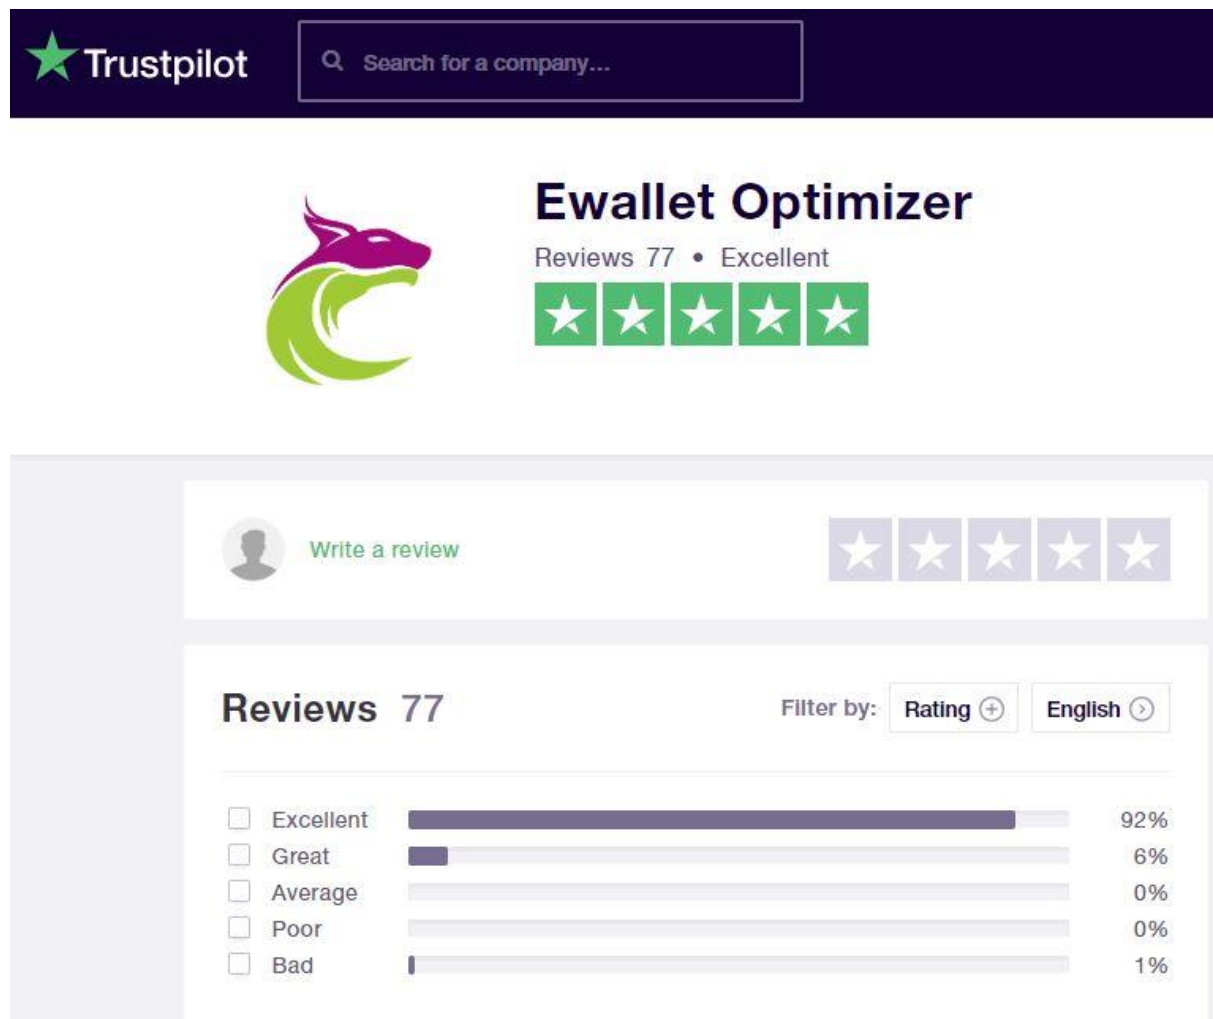

This obviously depends on your monthly and yearly deposit volume to bookmakers.

The average monthly cashback for players I've introduced to [eWallet-Optimizer](#) has been around £100 to £150 with a low 5-figure deposit volume.

That works out at between £1200 and £1800 per year – significant sums that all add up.

The good thing is once you sign-up for the program, your monthly cashback will grow together with your bankroll since your bets get bigger which leads to bigger deposits.

This is where the compounding interest kicks in, which will accelerate the growth of your bankroll. All in all, pretty much all the users have been happy with their decision to join the program as you can see from these examples of feedback on Trustpilot.com:

The screenshot shows the Trustpilot profile for 'Ewallet Optimizer'. At the top left is the Trustpilot logo. A search bar contains the text 'Search for a company...'. The company name 'Ewallet Optimizer' is displayed in a large font, with 'Reviews 77 • Excellent' below it. A row of five green stars represents the overall rating. Below this, there is a 'Write a review' button with a user icon and a row of five grey stars. The 'Reviews 77' section includes a 'Filter by:' dropdown menu with 'Rating' and 'English' selected. A horizontal bar chart shows the distribution of reviews: Excellent (92%), Great (6%), Average (0%), Poor (0%), and Bad (1%).

Rating	Percentage
Excellent	92%
Great	6%
Average	0%
Poor	0%
Bad	1%

They offer great perks for ecopayz...

They offer great perks for ecopayz users.

Instand Gold status, great cashback program, fast verification and most importantly they have excellent, very helpful and fast customer service - they'll help you with every problem you have with ecopayz and they'll do it very fast.

Cashback function exellent

Cashback function exellent. They are very serious , you earn money everytime you transfer.

WHICH E-WALLET DO YOU RECOMMEND?

In terms of cashback, VIP perks and bookmaker coverage, [Neteller](#) has currently the overall best program forbettors who transact a medium or high amount of money per year. [Neteller](#) has therefore been my personal favourite throughout the years and I would recommend using their e-wallet solution.

With a lower transaction volume, depending on your favourite bookmakers, [ecoPayz](#) might also a viable option as it offers instant Gold VIP and a good amount of cashback right from the start.

The key thing to realise is that as long as the e-wallet is created under eWallet-Optimizer or is attached to them, you can use the one you personally like the best.

WHO CAN JOIN THE EWALLET-OPTIMIZER PROGRAM?

All new e-wallet accounts at [Skrill](#), [Neteller](#) and [ecoPayz](#) are eligible to join the program and will be automatically accepted after signing up. If you have an existing account with any of them, you can join the program if following conditions are met:

1. Your account hasn't been used for transactions during last 3 months
2. Your account isn't tagged under another affiliate

Once accepted into the program, you can use your e-wallet account for deposits to any merchants: bookmakers, exchanges, poker sites, casino sites and forex sites. Your cashback will

be calculated from your monthly volume of these merchant transfers, and paid to your e-wallet on the following month.

No matter if you have a winning, breakeven or losing month in your betting, the cashback will form a steady stream of extra money as long as you make deposits to bookmakers on a monthly basis.

[To join the eWallet-Optimizer program, fill your details with a new or existing account here](#)

CAN YOU GIVE SOME INSIGHT ABOUT HOW TO MAXIMIZE YOUR EDGE WITH E-WALLETS?

Since transfers with e-wallets are pretty fast, I recommend *keeping most of your betting bankroll available on your e-wallet*. This way you can deposit to whichever bookmaker has the best odds available for your selections, and perhaps keep a few units available on those bookmakers that typically offer high odds for your selected sports.

Once you have cleared the rollover requirements on a bookmaker after depositing and placing your bets, you can make a withdrawal and soon have the money ready for deposits to any bookmaker.

The rollover requirements vary generally between 1-5x the deposited amount, which means you would have to make bets worth between £1000 to £5000 if your deposit is £1000.

With so called soft bookmakers that attract casual bettors and are usually European, such as Bet365 and William Hill, the usual rollover requirement is 1x the deposited amount. Below you can find examples of rollover requirements for some well-known sharp bookmakers and exchanges:

Pinnacle: 5x the deposited amount

18Bet: 5x the deposited amount

SBOBet: 3x the deposited amount

188Bet: 1x the deposited amount

Dafabet: 1x the deposited amount

12Bet: 1x the deposited amount

Betfair: 1x the deposited amount

Matchbook: 1x the deposited amount

Smarkets: 1x the deposited amount

The more turnover in deposits you create, the more cashback will be paid to your e-wallet the following month. You can calculate the exact amount of cashback you will receive to your e-wallet by using [eWallet-Optimizer's](#) cashback calculator, which you can find on their website after signing up.

ANYTHING ELSE YOU WANT TO ADD?

Once your e-wallet account is confirmed and verified, you can top up the account by your preferred payment option. The international bank transfer can be recommended, since it is almost always the cheapest method with no fees whatsoever on the deposit, and typically takes a few business days to clear.

In case you encounter any issues with your e-wallet account, eWallet-Optimizer's team is here to help you 365 days a year through personal Skype support to help with any issues 365 days a year. Don't hesitate to get in touch if you need assistance with anything related to your account!

SPECIAL INSIGHT: HOW HOLDERS OF EXISTING E-WALLET ACCOUNTS CAN ACCESS THE BEST POSSIBLE CASHBACK DEAL

This section is written for those of you with a very specific question:

What can you do if you are already using Skrill, Neteller or ecoPayz and your account is not receiving or eligible for cashback?

Possible reasons for not being eligible for cashback include being an active e-wallet user already, having a VIP status or being tagged under another affiliate, as in these cases the e-wallet brands would not see giving additional benefits to you as a viable business decision. What are the options to overcome this problem? To answer this question, we have covered this topic below, which include instructions on how to ensure you get cashback whatever your circumstances...

Step 1. Apply for eWO cashback program with your existing e-wallet account.

In case you haven't used your account in the last 6 months and it's not currently a VIP account, your application for cashback has a very high chance of being approved. You can apply with your [existing e-wallet account here](#).

Step 2. If your account was NOT approved for eWO cashback program in step 1, choose the specific situation that applies to you from below:

A. My existing Skrill account was not approved for cashback:

You can get better benefits by opening a Neteller account. Neteller is very easy to use if you're already familiar with Skrill, and they are both operated by the Paysafe Group. [Open your Neteller account here](#)

B. My existing Neteller account was not approved for cashback:

You can get better benefits in terms of cashback by opening and using a Skrill account temporarily.

Both Skrill and Neteller are operated by the same Paysafe Group and a wide selection of bookmakers & exchanges offer these deposit methods. Using a Skrill account temporarily for 6 months allows you to reset the activity on your Neteller account, after which you can [re-apply to the eWO cashback program](#) with your old Neteller account.

Simply put, you earn cashback for 6 months when using Skrill, and you can earn even more cashback with your old Neteller account 6 months from now if you make the switch. [Open your Skrill account here](#) and set a reminder to re-apply with [Neteller](#) once 180 days have passed!

C. My existing ecoPayz account was not approved for cashback:

You can get better benefits in terms of cashback by opening and using a Neteller account. Neteller offers a wider selection of bookmakers & exchanges compared to ecoPayz, so you might also be able to explore some new bookies that are not currently offering ecoPayz as deposit option. [Open your Neteller account here](#)

Step 3. Start making deposits, enjoy the cashback and continue to grow your bankroll!

3 REAL-LIFE CASE STUDIES

EXAMPLES OF PUNTERS MAKING CASHBACK BY UTILISING E-WALLETS

CASE STUDY 1: TREVOR - £100 PER MONTH / £1200 PER YEAR

Trevor follows the English soccer leagues and frequently finds profitable games to bet on, mainly on League One & League Two. He also likes to trade these matches on Betfair and place some arbitrage plays, once he sees the market is about to move. To move his money between Betfair and several bookmakers, he uses Neteller achieving a monthly volume between £20-30k making close to £100 cashback per month.

While the extra cashback might seem quite modest at £100 per month – this equates to an extra £1200 per year – a substantial sum especially for the tiny amount of work involved in transferring his money.

Recently, these cashback sums have started to add up, thus allowing Trevor the chance to grow his bankroll about half a unit faster per month than he otherwise would, and it's risk-free unlike his income from betting that varies month-to-month. The cashback arrives into his Neteller and is instantly available for depositing just like the rest of his bankroll kept on Neteller.

CASE STUDY 2: ANDREW - £330 PER MONTH / £3,960 PER YEAR

Horse racing and soccer have been Andrew's interest for several years, and he wins quite steadily from both.

On a typical day Andrew backs horses with between £50 and £100 per bet, and soccer up to £300 per bet as it has lower variance than horse racing. With several of these bets he averages £1500 turnover per day and £45,000 a month, which translates to having Platinum VIP status on Neteller and receiving around £330 cashback per month.

While Trevor grew his bankroll over half a unit faster per month, Andrew benefits even more from the cashback program as he gets an extra unit per month just from his deposits to bookmakers.

CASE STUDY 3: IGNAZIO - £140 PER WEEK / £7,280 PER YEAR

Ignazio is a high-volume bettor who has a mathematical approach to betting. He utilises exchanges and aims to make a 3-4% ROI long-term. With an average bet hovering around £500 and a weekly volume of £20,000 he can squeeze out a profit of £600-£700 weekly.

For a punter like Ignazio, the cashback program has a significant impact on his edge. He also has a Platinum VIP status on Neteller and makes around £140-£150 per week extra, which increases his total profits by +20%. Basically Ignazio gets extra winnings of a week per month just for taking advantage of this method of his money transfers!
